<b>Name of Activity</b>	: Social Activity
<b>Date &amp; Time of Activity conducted</b>	: 29/01/2024, 07:30 to 10.00 a.m.
<b>Target Group</b>	: B. A. II., III.
<b>Participated Number of Students</b>	: 45
<b>Name of the Organizer</b>	: Dr. N. I. Shaikh : Dr. V. N. Sahadev

On January 29, 2024, the Department of Hindi orchestrated a compelling social endeavor, taking B.A. II and III students to Oxygen Park, situated at Tasgaon Road, Peth Vadgaon, from 07:30 to 10:00 a.m. Spearheaded by Dr. N. I. Shaikh and Dr. V. N. Sahadev, the activity aimed to nurture a profound understanding of environmental conservation among participants.

The visit commenced with an insightful exploration of Oxygen Park, enabling students to witness firsthand the diverse array of plant species and their ecological significance. Guided discussions meticulously elucidated the pivotal role of green spaces in mitigating pollution and enriching urban biodiversity, deepening students' comprehension of environmental dynamics.

Emphasizing the practical dimension of environmental stewardship, students actively engaged in watering the park's plants. With ardent dedication, they watered a total of 200 plants, recognizing the critical importance of adequate hydration for plant growth and vitality. This hands-on experience not only honed students' practical skills but also instilled

within them a profound sense of responsibility towards nurturing and preserving green spaces.

The activity culminated as a transformative learning experience, seamlessly melding theoretical knowledge with practical application. Through their active participation in the maintenance of Oxygen Park, students demonstrated an unwavering commitment to sustainable practices and environmental well-being. Ultimately, the visit fostered a deeper connection to nature among participants, paving the way for a generation of conscientious stewards dedicated to preserving our planet's precious ecosystems.

Overall, the Department of Hindi's visit to Oxygen Park epitomized the spirit of experiential learning, leaving an indelible mark on participants and reaffirming the significance of environmental consciousness in today's world.

Outcome:

The visit to Oxygen Park resulted in heightened awareness of environmental conservation among B.A. II and III students. Through hands-on activities like watering 200 plants, participants gained practical insight into plant care and demonstrated a commitment to sustainable practices, fostering a deeper connection to nature.
